

Project One Proposal

Project Name

One Fine Day

Project Description

Create an app that shows the weather on any given day within the next week and provides suggestions of what there is to do according to some user choices.

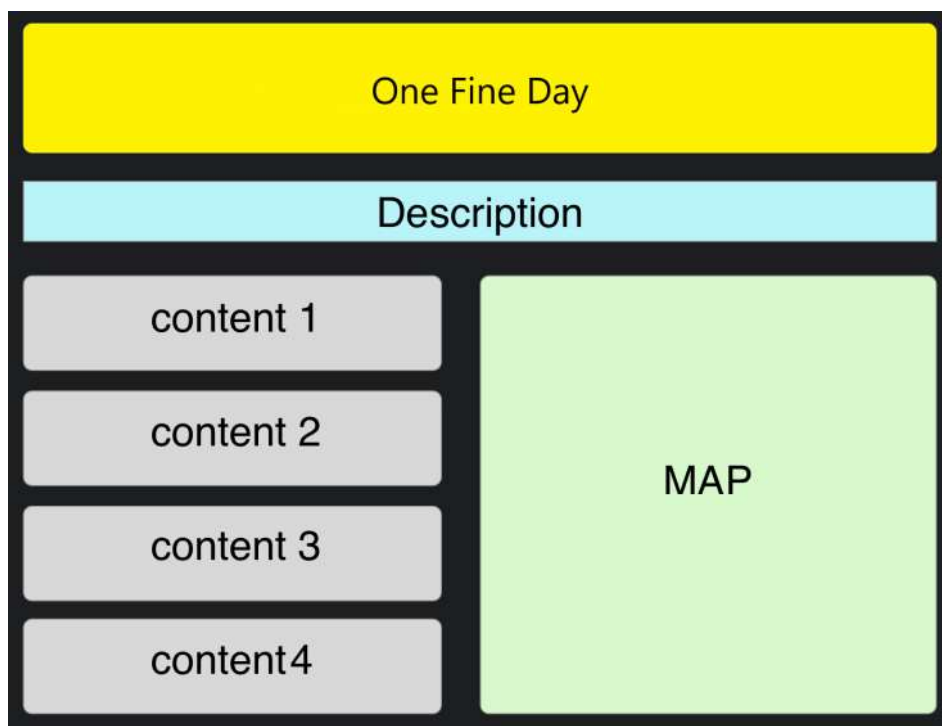

User Story

As a user.

I want to see what the weather is like on a specific day and be given some options of what to do.

So I can plan my day in advance.

Wire Frame

API's

Server Side API's

Ticketmaster

GoogleMaps

BreweryDB

Spoonacular

Proposed CSS Framework

Ionic

Task Breakdown

Weather & Events (mvp)

- Research API's and get keys
